## Summary

Final-year undergraduate in Computer Science Engineering with practical experience in .NET full-stack development. Completed the Wipro TalentNext Software Engineering Program, acquiring real-world experience in C#, ASP.NET Core MVC, Entity Framework Core, and SQL Server. Solid background in OOPS, Data Structures, DBMS, and Operating Systems. Passionate about backend development and designing scalable, practical software systems. Seeking an entry-level Software Developer position to contribute to product development and enhance technical expertise.

## Education

|                                                                          |                     |
|--------------------------------------------------------------------------|---------------------|
| <b>Chandigarh University</b> , Computer Science and Engineering–7.26*/10 | Sept 2022 – Present |
| <b>Intermediate</b> , Punjab School Education Board – 92.4%              | 2022                |
| <b>Matriculation</b> , Punjab School Education Board – 95.0%             | 2019                |

## Training

|                                                                                                                                                                 |                      |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------|
| <b>WiproTalentNext - Software Engineering Program   Chandigarh University</b>   Onsite, India                                                                   | July 2025 – Oct 2025 |
| - Attained structured training in <b>.NET Full Stack Development</b> , including the <b>backend</b> , <b>frontend</b> , and <b>database</b> aspects.            |                      |
| - Acquired practical experience with <b>C#, ASP.NET, SQL Server</b> , and fundamental <b>software engineering concepts</b> .                                    |                      |
| - Developed and implemented <b>full stack applications</b> using <b>.NET frameworks</b> , enhancing knowledge in <b>MVC design</b> and <b>API development</b> . |                      |
| - Improved <b>problem-solving abilities</b> through module-based exercises and coding challenges with an industrial focus.                                      |                      |

|                                                                                                                                              |                       |
|----------------------------------------------------------------------------------------------------------------------------------------------|-----------------------|
| <b>Blockchain Technology Summer Program   Chandigarh University × Metacrafters</b>   OnSite, India                                           | June 2024 – Sept 2024 |
| - Attained hands-on skills in blockchain development through Web3 training.                                                                  |                       |
| - <b>JS PROOF(Beginner)</b> : Basic knowledge of <b>Web3</b> JavaScript to create dynamic and interactive pages for blockchain applications. |                       |
| - <b>ETH + AVAX PROOF(Intermediate EVM)</b> : Development of smart contracts in Solidity, gas optimization, arrays, and DApp integration.    |                       |
| - <b>POLY PROOF (Advanced)</b> : Scalable blockchain development on Polygon with <b>Proof-of-Stake</b> sidechains for efficient and low.     |                       |

## Projects

|                                                                                                                                                                                                                           |            |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------|
| <b>UniWear – E-commerce Web Application</b>                                                                                                                                                                               | March 2026 |
| - Developed a full-stack <b>e-commerce application</b> using <b>ASP.NET Core MVC</b> , <b>Entity Framework Core</b> , and <b>SQL Server</b> with product modules for Men, Women, and Kids.                                |            |
| - Implemented <b>secure authentication (ASP.NET Identity + Google OAuth2)</b> , <b>wishlist</b> , <b>cart</b> , and <b>AJAX-based filtering/sorting</b> with a responsive UI.                                             |            |
| - Integrated <b>Stripe payment gateway (test mode)</b> for secure transactions and enhanced user experience using <b>Bootstrap</b> .                                                                                      |            |
| <b>Expense Tracker</b>                                                                                                                                                                                                    | Aug 2025   |
| - Developed an enterprise-level <b>Expense Tracker</b> application from scratch using <b>ASP.NET Core MVC</b> and <b>Entity Framework Core</b> , handling <b>CRUD operations</b> for expense categories and transactions. |            |
| - Utilized <b>Syncfusion UI libraries</b> to create interactive <b>grids</b> , <b>charts</b> , and <b>dashboards</b> with <b>paging and sorting</b> capabilities for efficient data management.                           |            |
| - Designed and implemented a <b>dashboard with graphical expense analysis</b> and a <b>dockable side menu</b> to enhance usability and user experience.                                                                   |            |

## Achievements

|                                                                                                               |          |
|---------------------------------------------------------------------------------------------------------------|----------|
| - Secured <b>All India Rank 10144</b> in <b>NCAT 2025</b> by Code Ninjas Studio                               | May 2025 |
| - Received the <b>DLL Star Performer Award</b> for ranking in the TOP 1 Percent in the Cloud Computing course | Jan 2025 |

## Skills

**Programming Languages:** C, C#, C++  
**Frameworks:** ASP.NET Core MVC, .NET, Entity Framework Core  
**Web Technologies:** HTML, CSS, JavaScript, REST APIs  
**Database:** SQL Server, MySQL  
**Core Subjects:** Data Structures and Algorithms, Operating Systems, DBMS, OOP  
**Developer Tools:** Visual Studio, VS Code, Git, GitHub

## Certifications

|                                                         |                       |
|---------------------------------------------------------|-----------------------|
| - Microsoft Getting Started with ASP.NET Core, Coursera | Jan 2026              |
| - Data Structures and Algorithms, Coursera              | March 2025            |
| - Foundation of Cloud IoT Edge ML, Swayam               | Feb 2025 - April 2025 |
| - Cloud Computing, Swayam                               | Jan 2024- April 2024  |
